

HONOURABLE MENTION

Category CONSUMER PRODUCTS - INNOVATION

Company: **SolarCar**

Country: **Netherlands**

Product Name: **SolarCar Power Top**

All-in-1: The PowerTop houses an invisible safety frame of stiff aluminum with integrated wires, the black box, the solar panel, interior handle, and beautifully shaped body panels – so no unsightly boxes protruding out of awkward places that you hear rattling when driving around.

The Solar Panels are 100% transparent - two layers of certified safety glass keep the solar cells in their place and round – shaped by the internal aluminum protective frame.

From the Jury

“The way the solar panel is integrated into the roof for this outdoor application is worth an honourable mention.”
